Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

First of all, this is written under my husband's account, but I began homeschooling my 8 yr old last year. And now, as he is a 3rd grader, and began studying history/geography, I knew I wanted an excellent atlas/textbook that was able to aid in my schooling.. However, I was not sure if any such thing existed.. Then, I stumbled upon this National Geographic Kids Atlas...What a wealth of information!!!! And the way it is broken down country by country!!! Absolutely so informative!! It gives political info about every countries pop., highest mountains, longest rivers, largest cities, etc..!! My 18 yr. old college bound daughter took one look at it, and said, "man, why couldn't I have had something like this to help me when I was studying geography? This is totally cool!! " And she

graduated this past May, Summa cum laude, is an avid reader, and was recognized as one of the top 20 Scholar Bowl History Students in the nation two years in a row...(so I am confident she knows her material!!) If you are looking for any material for your home, as a homeschool mom, or just for reference, this is it!!

I replaced a geography workbook which my 10-year old daughter hated with this book which she enjoys very much. She loves reading the information as well as looking at the maps very much. I used an alternate project last week and she was very disappointed to not get to read this book too.

Great world atlas for elementary and middle school kids. Has a lot of awesome information. It is lacking a bit as a high-school resource but can still be helpful and informative to them too. Great photos.

This is not written for children. The syntax and vocabulary used in this book are for a much more sophisticated reader. Don't expect a child under 12 to get much out of the text. You would do just as well to choose a proper atlas that your child will look at now, and eventually take to college.

Very pleased. Great information. Highly recommend. My 7 yr old and I have both learned a lot from it. Certainly a good refresher for me, too.

Wonderful book for younger kids who love geography and multi culture. Always love National Geographic books. I will recommend it to other for sure!

I gave this atlas and the Pioneer Globe to my 7year old nephew for Christmas. He loves both and I plan to send him postcards from places I go in the world to enhance his interest in geography.

My daughter loves this atlas! She was reading it all weekend. Not only does it have maps from all over the world , it has fun activities for kids and interesting facts about a variety of topics. It was very reasonably priced. I'm very happy with my purchase!
