What a terrific way to teach history - without boring kids to death. I love this book and I am so pleased to see this type of book published for young folks. I learned from this book and enjoyed it thoroughly. As a retired school librarian, I would have definitely wanted these books in my elementary school library. The illustrations are really nice and the information is presented in a very good way.

Purchased this for my 8 year old who is going through an Egypt phase! She loved the book and read it without being asked! That to me is a good book! She also used it for a report which was a bonus as well, because sometimes at this age it is hard for a child to do a research paper and put fact into their own words. This book delivered the facts and concepts so that she could easily write her own paper in her own words and have some good facts to back it up.

Our "adopted" grandson who was an exchange student from Cairo lives 32 minutes from the Pyramids and the Sphinx. It was fun to share the book with our younger grandsons so they could learn about their brother from Egypt,

Lots of good information here. Scientific methods keep improving, and more information is being extracted about the old tombs and the ancient culture, and the likely means used to build them.

My soon to be 7 year old son has started in on "chapter books" and loves this series. We've been reading a chapter a night and he loves it.
