Age Range: 4 - 6 years

Grade Level: Preschool - 1

Customer Reviews

I purchased Wind, Rain, Clouds and Snow. Wonderful short science books and very easy for young readers. My 5 year old twins love to read their 'science' books. It is difficult to find simple non fiction books for this age group, but these are perfect fit.

My son first read this book at the library and fell in love with it. The author does a phenomenal job of explaining clouds to children as young as three. Beautifully illustrated too! My son now knows the three main types of clouds (he's four!).

Although the information is good, this book was too much for my son. It's rather wordy for a just-turned-3 yr old with too extended descriptions. Did not keep his attention. Maybe better when

he's some months older.

I liked the content, giving the reader the names of clouds and how they effect nature. Very good series - expect to order more.
