Learning To Program In Pascal And Delphi (GCE Computing)

Synopsis

This book is designed to help students on the AQA 'AS' Level Computing course to learn the programming covered in Unit 1, and to enable the Unit 3 Practical Exercise to be tackled using either Pascal or Delphi. It will also be useful to students learning to program in Pascal or Delphi on other courses. The book covers the basic programming constructs of Pascal, including saving to different file structures. It introduces the visual development tool Delphi and explains how to use some of its many components to produce event-driven applications, including connecting to and working with data stored in a database.
